

A TIP TO AID MEMORIZATION

Written by Publisher

A TIP TO AID MEMORIZATION - "I typed up each A of F in large type and laminated each sheet. Each A of F was then cut into 2/3 word sections, and all the pieces relating to that particular A of F was placed in an envelope, and the number of the A of F put on the outside. The children choose whichever envelope they're up to, and put together the A of F (using the scriptures or an A of F card if necessary). They then read and repeat it, several times, each time taking away a piece of their own choosing, until they can say it with all pieces gone. It's amazing how quickly they learn using this method. Particularly good too for the 'slower' learners!"
